

Sample Business Plan

The companies XXX Management Consulting and XXX Industrieautomations- GmbH (GAK GmbH) Reg. No. XXX AG (district court) Köln, provide industrial services throughout the complete value chain of major international clients, in the field of project- and site management for the cement and steel industry, worldwide.

Our companies` core competence lies in the excellent knowledge of its managers and the exceptional abilities of our high-profile service staff. During the 26 year period that we have been in business with some of the worlds largest industrial suppliers (e.g.AAA Services GmbH) we have been able to maintain and steadily push our claim in that field upwards. The Managing Director, Mr. XXX, and all our engineers are degree and professionally qualified. Our companies are full members of the German “Chamber of Industry and Commerce” (IHK) - member no. XX06.

Nonetheless the market we operate in is undergoing a rapid change that has even intensified during the last five years. The openings of new major markets as well as the appearance of other competitors force us to restructure our activities.

During an intensive market due diligence we have identified the XXX Free-Zone to be the perfect location to form a subsidiary. Alongside the investment-friendly environment we appreciate the tax regime, local government and the high living standard in XXX. We believe that an establishment there can give us “the best of both worlds” – to combine German engineering knowledge and diligence with the U.A.Es’ “can-do” trading mentality.
